Sultan's

WHAT WE DO...?

★ CIVIL WORK (Construction/Renovation)

We deal with the design, construction, and maintenance of the physical and naturally built environment, including works like buildings, roads bridges, canals, and dams.

★ INTERIOR DESIGN & DECORATION

Art of decorating a Room, House or Office so that it is attractive, easy to use, and functions well with the existing architecture. Our goal of interior decoration is to provide a certain "feel" it encompasses applying wallpaper, painting walls and other surfaces, choosing furniture and fittings, such as light fixtures, and providing other decorations for the area such as paintings and sculptures. Interior decorating is done professionally by our interior decorators.

★ SPACE UTILIZATION PLANNING

An inventory of your space is just the beginning. Often the most cost effective way for our clients to meet growing demand for space is to measure the effectiveness with which current or proposed space is used. Space utilization analysis is the process of providing analytical tools to determine space requirements and measure the viability of existing or proposed alternatives. We use sophisticated computer modeling techniques to analyze your existing and proposed space. These models are used to measure your space against benchmarks and other standards. This master planning inside the building technique allows us to help you regulate requirements and illustrate options.

★ LANDSCAPE & GARDEN DESIGN

We approach to urban design in which the elements of cities (water, landform, vegetation, vertical structures and horizontal structures) are composed (visually, functionally and technically) with regard to human use and the landscape context.
